

Carrier Optimal Routing

- The NALC is permitted to have a USPS trained District Team member serve as the NALC COR technician in conjunction with, or in lieu of the DEAT assigned to a zone when COR is used
- The NALC COR technician's role is to provide NALC direction to the management COR technician or assist the NALC DEAT in doing so
- In situations where a USPS trained NALC COR tech is unavailable, the NALC DEAT can be replaced by another District Team member for the route adjustment phase when COR is used
